1966

Mar 27 Bornhurst & Cragg -

Lousy night with passing cumulus

Set up PEP with Quasar as guider - no good

New high voltage supply seems great

Worked Argus project visually about 1 1/2 hrs

✓ 3 variables but could just reach 15
with the lousy transparency

April 22 Ford, Carpenter, Cragg Saturn NG!
Variables in clear sky (Tr 6, Seeing 2-0)
17 vars, 13 sanctum - all visual

✓ 23 above + Bornhurst
Started on Project Argus (Bornhurst + Cragg)
10 vars, 7 sanctum (Tr 6 1/2, Seeing 2-1)
tried out PEP, needs guider to operate

✓ 24 Ford, Cragg
Variables, 19 + U Gem run (86 est) all visual
26 for CR, 17 sanctum
Seeing 2, Tr 6 1/2.
